

Structures over 200 sq ft must have permits.

Any structure over 200 sq ft built in Stone County requires a permit, regardless of the purpose of the structure. The same is true when you are purchasing a prefabricated building to place on your property. This has been enforced since 2008.

Our new construction packet explains the process. Please call our office at 601-928-2810 or e-mail build@stonecountyms.gov if you have questions.

Permit fees are doubled if work begins before permits are approved.
