Stone County Planning and Building Department

311-C Court Street; Wiggins, MS 39577 build@stonecountyms.gov

Phone: 601-928-2810

Fax: 601-928-2991

8:00–5:00 Monday–Friday (Closed 12-1 for lunch)

Procedure for Obtaining Permits for Residential or Commercial Construction:

Stone County enforces the 2003 IRC Code – You can view it online at: https://codes.iccsafe.org/content/IRC2003/table-of-contents

- Complete permit application It can take up to two weeks to approve your permits.
 - Residential fees are calculated on the heated, and unheated square feet of the building.
- Complete application for new E-911 Address, if an address does not already exist.
- Provide a copy of preliminary approval (<u>PERK Test</u>) of a septic system from the Mississippi Department of Health. A <u>Final Approval</u> from the MS Dept of Health is required before our final inspection. For an existing septic tank, you must request <u>Approval for Existing Septic.</u>
 Go online to https://apps.msdh.ms.gov/WastewaterOnlineApp/PublicWasteWaterHome.aspx
 On the left sidebar, choose "I want to apply for" and choose Residential.
 - *If you are connecting to a community sewer, we need a **Letter of Intent** from the provider.
- Copy of your recorded **DEED**, including **RESTRICTIVE COVENANTS**. If you are not the property owner, you must provide permission from the owner and a copy of their recorded deed.
- Tax parcel number for the property find this on your tax bill.
- Two complete sets of construction plans *PLANS MUST BE APPROVED BEFORE STARTING*
- Pdf file of <u>construction</u> plans emailed to us at build@stonecountyms.gov

ROUGH-CUT LUMBER IS NOT ALLOWED

- If you are using pre-engineered trusses, we need these truss drawings.
- Plot plan a descriptive drawing showing the location of the dwelling on the parcel.
 - <u>If</u> the structure is located within a **flood zone**, an elevation certificate, and a site plan is required.
 - **COMMERCIAL** A Site Plan is required <u>if</u> it is a commercial building. A site plan shows various things such as property lines, contour lines, flood zones, and sometimes adjoining landowners.
 - *Commercial fees are calculated using the full cost of the structure, including electrical, plumbing, and mechanical. These costs must be broken down by trade.

You must begin work within six months of your application or a new application is required.

Revised March 2025

Stone County Planning and Building Department

Typical Order of Inspections

Please call 601-928-2810 to schedule inspections.

6.	Final Inspection — When everything on the plans is complete. Building, Electrical, Plumbing, Gas, and Mechanical		

INSPECTION CHECKLIST

A failed inspection requires a \$25.00 reinspect fee to be paid before the reinspection.

Stone County enforces the 2003 IRC Code – You can view it online at:

https://codes.iccsafe.org/content/IRC2003/table-of-contents

Note: This list is not intended to be an all-inclusive list of items for inspections

POWER POLE INSPECTION

No 2 wire from box to weather head

Neutral wire marked on both ends

Continuous ground from grounding rod through the box to the meter

Ground wire stapled to the pole One 110 receptacle (temporary) One 220 receptacle (temporary)

PLUMBING STACK TEST

All drainpipes must be visible

All openings capped

Stack pipe no less than 10' in length

Must be filled with water and maintained for at least 15 minutes

Check for leaks

Check sweeps and all connections

Check the slope of pipes

FOUNDATION

Proper size footings

Proper rebar according to plans Certification from pest control

Moisture barrier

Sleeved copper must not touch rebar

ELECTRICAL ROUGH-IN

Proper placement of panel Nail guards above panel

Count wires coming into panel to ensure proper panel size

All wiring run Boxes in place

Wiring secured (must be at least 1 ½" from edge of studs)

Wiring properly sized
Nail guards where needed
Copper water lines grounded

Romex connectors on exhaust fans, etc.

Proper receptacle placement

Hard wired & interconnected smoke alarms in every bedroom and hallway

Fire caulking where necessary

Receptacles on exterior (one in front and one in back – with one receptacle within 25' of

condenser)

Service entrance cables labeled other than MC, SE, USE must be in conduit between the

meter base and inside power panel

PLUMBING ROUGH-IN

All plumbing must be in place

Sweeps placed correctly

Traps and vents where necessary

One vent completely exiting the building – 3" in size minimum

Pipes secured where necessary

Nail guards where needed (must be 1 1/4" from edge of stud)

Utility boxes in place

Must have a minimum of 18 inches of 2" pipe between utility box and trap

Fire caulking where necessary
Tub boxes in slab must be sealed

b must be sealed Page 1/2

FUEL GAS ROUGH-IN Must have pressure on lines 4-10 lbs to ensure no leaks

Piping must be secured (must be 1 ¼" from edge of studs)

Nail guards where necessary

Strapped securely at all connections

Fire caulking where necessary

MECHANICAL ROUGH-IN Appliances must have a label with all proper information

Must have access to equipment

Equipment in attic must have workspace (minimum 30" on panel side)

Attic installations - must have a clear, unobstructed walkway (22" wide, no more than

20 feet in length) must be continuous solid flooring Light controlled by a switch near the equipment

Receptacle near equipment

Vents for dryer and bathroom fans must exit the building

Check drains and traps

All metal ductwork must be screwed and taped with proper tape

All flexible ductwork or manufactured ductwork must be installed to the manufactures

specification

Fire caulking where necessary

FRAMING ROUGH-CUT LUMBER IS NOT ALLOWED

Moisture barrier on exterior of building

Anchor bolts and washers are appropriately spaced

Proper bracing

Fire blocking where necessary Hurricane straps where needed

Sheeting secured

Cripps under-door headers

Joists must be properly sized to the span Beams must have proper support

No bracing off of strong backs (bracing must be done off of load-bearing walls)

FINAL Look for vents exiting the building

(Outside) Vacuum breakers on outside faucet

Numeric address on building

A/C condenser on pad 3" above ground A/C condenser must have a disconnect box Properly sized breaker for A/C condenser

The whip from disconnect box to condenser must be fastened to building Plumbing clean-outs must be below ground level and have a cover box

FINAL Check breaker panel for proper size breaker and arc fault breakers where necessary

(Inside) All breakers must be legibly identified

GFCI receptacles in kitchen and bathrooms

Test all smoke detectors

All tubs with motors must have access to the motor Windows in bedrooms must be properly sized Arc fault breakers required in bedrooms

FINAL Check all drains

(Attic) Insulation on pipes where needed

Walkways Lights in attic

Stone County enforces the 2003 IRC code https://codes.iccsafe.org/content/IRC2003/table-of-contents

Stone County Planning and Building Department Final Inspection Checklist - New Single-Family Dwelling

(Please review this list before calling for inspection.)

NOTE: This is <u>not</u> an all-inclusive list, each job will have specifics.

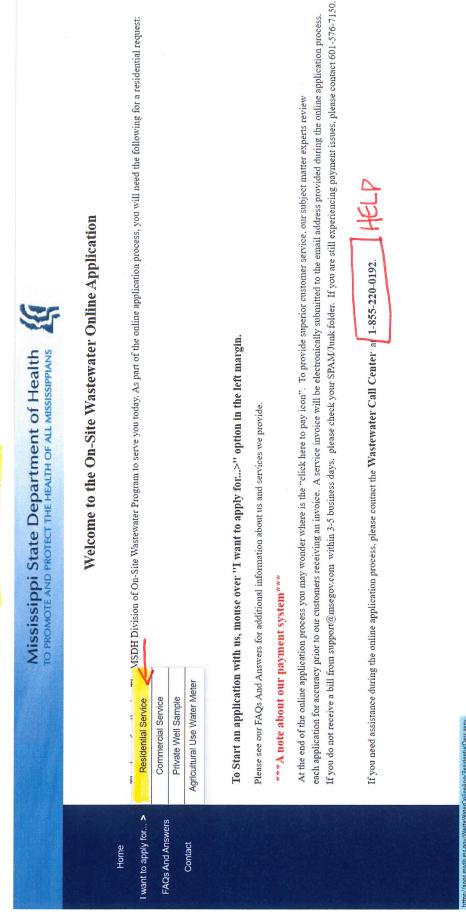

- o All work pertaining to the plans and issued permits must be completed
- Windows in bedrooms must be properly sized
- GFCI receptacle on front and rear of house
- o GFCI receptacles in kitchen and bathrooms
- Must have a working sink in kitchen all additional sinks must also work
- Electrical panel
 - Must be labeled
 - Arc fault breakers where required (bedroom and smoke detectors)
- Attic access required
 - Walkway and workspace required if equipment is in attic
 - Light / receptacle in attic if equipment is in attic
 - Check all drains
 - Insulation on pipes, where needed
- Must have one working tub or shower any additional tubs and showers must also work
- Must have one working toilet any additional toilets must also work
- Tubs with motors must have access to the motor
- Smoke detectors must be tested
 - Must be hard wired and interconnected
 - Must be on arc fault breaker
- Must have hot water
 - Drain pan for water heater, if required
- Heating system must be working
- Return air closet must be sealed
- Numeric address (numbers) must be on the structure in contrasting color

Go online to apply for a **PERK test** "Permit/Recommendation" with the MS State Department of Health: https://apps.msdh.ms.gov/WasteWaterOnlineApp/PublicWasteWaterHome.aspx

THE OWNER'S CONSTRUCTION PERMIT RESPONSIBILITIES

Homeowners are allowed to act as their own contractor if you plan to live in the home, this comes with responsibilities. If you pull permits and act as your own contractor please read and agree to "The Owner's Construction Permit Responsibilities".

It is not the position of Stone County, Mississippi to keep anyone from legally acting as general contractor for the construction, repair or remodeling of their own project. We do hope to prevent unlicensed contractors from taking advantage of you by having you obtain a construction permit in your name. The following list is not intended to be a legal guide or advice, nor is it all encompassing, but only to point out some of the hazards of acting as your own contractor.

- 1. You may be financially responsible for any person that is working under your direction, which is injured while working on your job. This financial responsibility may include hospitalization cost, unemployment compensation, law suits for lost wages and workman's compensation. We are not aware of any existing homeowners or builder's risk policies that cover this type of loss.
- 2. You may be responsible for withholding certain taxes on persons working under your direction and supervision.
- 3. If you do not obtain contractors' general liability insurance, you may be personally liable for the injury of any person that is hurt on your property while construction is in progress. Your homeowner's or builder's risk policy likely does not cover this type of loss.
- 4. The Mississippi Supreme Court has ruled in a precedent setting case that any person named as the contractor on a building permit for the construction of a residence is deemed the responsible party for losses by future owners. If major structural damage occurs up to six years after construction and you are listed as a contractor on the permit then you may assume this responsibility. This responsibility may not be superseded by a secondary waiver with any person or uninsured company.
- 5. If you hire a licensed general contractor, it reduces the likelihood of claims being made against you by subcontractors or others.

Owner's Acceptance and Certification of Construction Permit Responsibilities

•	I confirm that this construction meets the following exception: (check one)			
		A commercial project on my property which is not for sale, lease, public use or assembly.		
		A commercial project or new residential building under \$50,000 on my property.		
		A residential remodel under \$10,000 on my property.		
		A new residence, residential addition or residential accessory structure on my property that will be my principle place of residence upon completion.		

- I have read and understand the "Owner's Construction Permit Responsibilities" above.
- I am aware of construction codes, county ordinances, and state laws applicable to this construction activity. I have the knowledge and/or experience to fulfill the duties of the general contractor.
- I understand that all work must be completed in conformance with current applicable construction codes
 and must pass inspections by the building inspector, and I will pay re-inspection fees for any reinspections required as a result of the work not being ready for inspection or not being in conformance
 with the applicable code when inspected.
- I understand that if after the work has been inspected the Building Official determines that I do not have
 the knowledge and/or experience to complete the work in conformance with applicable construction
 codes, the Building Official may stop the work and require me to engage a licensed contractor to
 complete the work.
